Mom, There’s a Monster Inside My Head!

_Gabriel & Adrián_  
B de Blok, September 2019  
Hardcover 220 x 220 mm, 48 pp

The self-published phenomenon that has become a children’s best-seller.

We all have a scary monster in our heads that tells us ugly things and drags us down. But we also have good monsters who encourage us to try again.

Eight-year old Gabriel crafted this tale to help other children overcome their frustrations and tempers when something doesn’t turn out quite right.

- A book that works on self-esteem and emotional management in children.
- Gabriel and Adrián’s parents published this book themselves, which is now a sales success with more than 5,000 copies sold in six months.
Y el TERCERO de estos comportamientos era el de los niños que no se metían con nadie, pero que cuando veían que alguien lo hacía, NO SE ATREVIAN A DECIR NADA. Ellos saben qué meterse con otros niños está mal, pero les da miedo decir algo para que no se metan también con ellos.

Otra cosa que también observó era que en la mayoría de los casos estas situaciones se daban en el patio. Hasta el punto de que el patio se convertía en UNA JUNGLA donde:

* los del primer compartimento tenían MIEDO (como una gacela antes de ser cazada)
* los del segundo comportamiento se sentían libres para atacar (como hienas)
* los del tercer comportamiento simplemente observa (como un rinoceronte)

A Vanesa se le encogía el corazón cada vez que veía situaciones en las que a los niños no se les trataban bien. Esto no debía ser así. El colegio y el patio debía ser un lugar en el que todos los niños se sintieran bien. Tenía que haber una solución.

Es evidente que chicos y chicas son biológicamente distintos, pero los hábitos sociales aumentan esas diferencias. Por ejemplo, en la cocina.

En general, es más habitual que las mujeres hagan las tareas de la casa: cocinar y limpiar. Pero ¿por qué? ¿Acaso es porque las mujeres nacen con el gen de la cocina, o bien porque han sido educadas para que piensen que su papel es cocinar?

Tal vez las mujeres sí nazcan con el gen de la cocina, pero ¿entonces por qué la mayoría de los «chefs» más famosos del mundo son hombres?

De pequeña solía mirar a mi abuela, una mujer brillante, y me preguntaba qué habría sido de ella si hubiera tenido las mismas oportunidades que un hombre.

Hoy en día, las mujeres tenemos más oportunidades que en la época de mi abuela. Y, sin embargo, nuestra actitud y nuestra mentalidad siguen pesando más.

¿Qué pasaría si, a la hora de criar a nuestros hijos e hijas, no nos centráramos en el género sino en la capacidad?

¿Y si no nos centráramos en el género sino en los intereses?

Hombres y mujeres somos distintos. Tenemos hormonas distintas, órganos sexuales distintos y capacidades biológicas distintas: las mujeres pueden tener bebés y los hombres no. Los hombres tienen más testosterona y por lo general más fuerza física (¡con excepciones, eh!).

La población femenina del mundo es ligeramente mayor y sin embargo la mayoría de los cargos de poder y prestigio están ocupados por hombres.

La premio Nobel keniana Wangari Maathai lo explicaba muy bien diciendo “cuanto más arriba llegas, menos mujeres hay”. Que haya más hombres líderes en el mundo es una situación que podría tener sentido hace mil años, cuando la fuerza era lo más importante para la supervivencia, pero hoy en día vivimos en un mundo muy distinto.

La persona más cualificada para ser líder ya no es la que tiene más fuerza. Es la más inteligente, la que tiene más conocimientos, la más creativa o la más innovadora.

Y para estos atributos no hay hormonas.

Una mujer puede ser igual de inteligente, innovadora y creativa que un hombre.

Hemos evolucionado. En cambio, nuestras ideas sobre el género no han evolucionado mucho.
En el exterior de la guarida, Campanilla vio salir a Garfio; el pirata aún sostenía el anillo en su mano y reía maliciosamente. Las hadas entienden el lenguaje de los ojos y de la risa mucho mejor que las palabras, así que enseguida supo lo que había pasado y todo su cuerpecito de hada se llenó de un solo sentimiento: ¡Peter! Bueno, tal vez es una palabra y no un sentimiento, pero las hadas son así, a veces sienten las palabras y pronuncian los sentimientos.

Pero volvamos al interior de la guarida, porque Peter se había despertado y estaba a punto de tomarse la medicina de Wendy. Sostenía el vaso y lo miraba tratando de decidir qué le daría más rabia a Wendy, si se tomaba la medicina o si no se la tomaba... Como tenía sed, eso bastó para convencerle. Se llevó el vaso a los labios y... Campanilla voló más rápido que nunca, se interpuso entre los labios de Peter y el vaso, bebiéndose hasta la última gota.

–¿Por qué te has tomado mi medicina? –protestó Peter.

Pero Campanilla no pudo contestar, el veneno estaba haciendo efecto y la pequeña hada se tambaleaba, incapaz de volar.

–Campanilla, Campanilla. ¿Por qué se está apagando tu luz? No dejes que se apague, Campanilla. No te enfríes, Campanilla.

Todas las hadas brillan con una luz especial, no se parece a nada que conocíais, su luz está hecha de risa y de alegría y, cuando la luz de un hada se apaga, significa que deja de existir.

Peter tomó a Campanilla entre sus manos tratando de darle calor, pero, finalmente, la luz de Campanilla se apagó.

Empezaron los ensayos y entró a la banda un bajista. Su nombre era John Deacon, un tipo tranquilo, modesto y un fenómeno de la electrónica. Fue en esos días, cuando Freddie Bulsara empezó llamarse Freddie Mercury, su nombre de artista, con el que brillar sobre los escenarios y dejar atrás su timidez natural.

Los cuatro se reunían en el teatro para escribir y ensayar durante incontables horas nuevas canciones. Buscaban un sonido innovador, perseguían la fuerza del Rock y soñaban con la belleza del teatro.

-No se trata de crear la mejor música, se trata de sorprender con un espectáculo inolvidable. Es todo importante, la interpretación, los efectos, las luces, el vestuario... –Freddie vociferaba mientras caminaba de punta a punta del escenario.

The best part is that he makes his answers into a story. And when we talk, it's great fun!

¿Por qué el dinero que se cobra a cambio del trabajo se llama «salario»?

Porque en el Imperio romano, los soldados recibían su paga en sal. Los romanos necesitaban de las salinas para conservar los alimentos, así que constabaasicamente sal.

El salario también se llama sueldo, término que a su vez proviene de los romanos.

En época romana muchas personas exigían que se les pagara en solidus (moneda de oro) y no en denarius, porque el denario era muy pobremente hecho con una aleación que no era realmente de plata (y, por tanto, valía menos).

¿De dónde viene la tradición de tirar monedas en las fuentes?

El agua es un elemento fundamental para la vida y es en muchos lugares esencial.

Por eso, en muchos lugares se consideraba que encontrar una pieza en un regalo de los dioses, así que en esos sitios se empezaron a dejar monedas.

De ahí viene la tradición de lanzar una moneda para pedir un deseo.

En la fuente dedicada a la diosa Coventina, en Inglaterra, se localizaron más de dieciséis mil monedas de diferentes países y épocas, desde el Imperio romano hasta la actualidad.

Llena la otra mitad de granos integrales (arroz integral, trigo integral, quinoa, centeno…) y proteínas saludables (lentejas, garbanzos, judías, tofu, tempeh…).

Esta receta es el resultado de mi obsesión por las naranjas sanguinas. Son tan efímeras que cuando están en temporada no puedo evitar comprarlas en cantidades industriales por miedo a no volverlas a encontrar en el mercado la semana siguiente.

Me encantan en bizcochos, tartas y mermeladas, pero nunca antes las había probado en un postre crudo. El resultado: esta tarta de sabor único, con notas agridulces que se equilibran y potencian con el dulzor de la miel y el amargor del cacao puro.

¡Apta sólo para gourmets!

Tarta de naranja sanguina y chocolate

Esta receta es un resultado de mi adicción por las naranjas sanguinas. En las afirmaciones que escuché durante una semana, no puedo evitar compararlas con sustancias ilícitas porque mis amigas y yo solíamos encontrarlas en los mercados de nuestras zonas rurales.
